

November 27, 2025: On tonight's movie - The Day the Earth Stood Still (2008)

"In 1928, a solitary mountaineer exploring the Karakoram mountains in India encounters a glowing sphere. He loses consciousness and when he wakes, the sphere is gone and there is a scar on his hand.

In the present day, a rapidly moving object detected beyond Jupiter's orbit is predicted to collide with Earth, destroying all life. The U.S. government assembles a group of scientists including Helen Benson and her friend Michael Granier to develop a survival plan. The object slows down and descends in Manhattan, revealing itself to be a large spherical spaceship.

The emergence of smaller spheres around the world causes widespread public panic."

You can see it now, right? 'The Dead Sea Scrolls', the orb of 'primordial chaos', the stigmata on his hand, the giant alien that can override earth's technological signals. . . This is not science fiction anymore. We are witnessing a military coup de tat from inside of the most powerful nation on earth. 'It' has gone live and 'they' are invading. We are experiencing an 'alien' invasion from humans that are attempting to be gods on earth. 'Spheres of oppression' are already actively oppressing individuals and groups across the world. This is a Nazi-rite overthrow of the USA government - planned and carried out from within the USA military. I guarantee it.
